

SPECIAL CENSUS - you've seen the signs everywhere, first asking for workers and now letting you know that it is going on. We still need more workers if you are interested.

What the special census does is shows the increase in population in our city so we can receive more Road Use Tax Revenue (RUT). RUT can be used for anything street related and will increase our proceeds by over \$500,000 over the next 4 years. What it also does is provide valuable economic data to our state to show how well we are doing or what areas we need to improve upon. The Special Census worker is gathering data that is COMPLETELY CONFIDENTIAL. They are in a building we leased for them and everything is kept under lock and key. They will input that data into a large data base to show the economic climate of our city and area. It also helps us know for planning purposes what the average household number is and the ages of those in the household. The School and the City greatly benefit from all of the data gathered which is used for the planning for the future of the school district and city services. SO THANK YOU in advance for taking your time to get back to them and answer their questions! THANK YOU for investing your time in your city! Happy Thursday!
