

SE Main Street Improvements

IMPORTANT CONSTRUCTION UPDATE!!

Absolute Concrete (General Contractor for the SE Main Street Project) has informed us of their intent to begin tree removals along SE Main Street and adjacent side streets beginning this **FRIDAY, April 26th**. It is expected that work will continue into Saturday, April 27th. Most of the trees that are to be removed are located east of the Grimes Community Center (GCC).

What to Expect

The tree removal subcontractor, Wright Outdoor Solutions, will utilize dump trucks, chain saws, a boom lift, and manual labor to remove trees and stumps that have been marked for removal. All branches, trucks, and twigs will be removed from the site. The subcontractor will have cones and other necessary signs up along the street to let people know if/where they can drive their vehicles safely.

What You Need to Know

This work will require that SE Main Street be shut down to thru traffic in front of the GCC building from 8am to 12pm on Friday. Parking in front of the GCC building will need to be moved to the north and south parking lots of the GCC. The entrances of said north and south parking areas will not be closed and parking will not be restricted. Patrons of the Community Center are asked to utilize the north and southeast entrances into the building.

It will be important to not bother the tree removal contractor so that he can get his work done quickly to get out of the way of the GCC and open SE Main Street back up to thru traffic.

This work does not count toward the Contractor's total allotment of working days for Phase 1 of the project. Official working days are estimated to begin the first week of May, barring adverse weather conditions.

If you need any special assistance or have further questions, please utilize the contacts highlighted below.

Primary Contact For Construction Concerns:

Contact: Mitch Holtz, Project Engineer
FOX Engineering
Phone: 515-233-0000 (office)
